G.F.C. 25-0-0 is a liquid foliar nitrogen designed for application to crops requiring supplemental nitrogen during the growing season. A portion of this nitrogen is in a slow release form, providing more efficient delivery of nitrogen.

G.F.C. 25-0-0 is a good carrier for pesticides in a spray mix. The Triazone slow-release nitrogen molecule prolongs wetting of leaves, allowing for greater penetration and less loss from crystallization on leaf surfaces.
