

GLADIATOR
WATER CONDITIONING AGENT
For Agricultural, Turf & Ornamental Sprays

PRINCIPAL FUNCTIONING AGENTS:

Proprietary blend of water conditioning agents, ammonium salts, and constituents ineffective as spray adjuvants100%
TOTAL**100%**

Net Contents: _____ 2.5 gal _____ 30 gal _____ 275 gal

Manufactured For:
Glades Formulating Corporation
P.O. Box 1690
Belle Glade, FL 33430

CAUTION

Keep Out Of Reach Of Children

PRECAUTIONS

Avoid getting in eyes, on skin, or in mucous membranes. Use with adequate ventilation. Keep container closed when not in use. Do not contaminate seed or water supplies. Use of safety glasses is recommended.

IN CASE OF CONTACT

Ingestion: Drink 2 glasses of water or milk if conscious. Seek immediate medical attention.

Eyes: Rinse with clean water for 15 minutes. Seek immediate medical attention.

Skin: Remove contaminated clothing. Wash with soap and water. Seek medical attention.

Storage: Store in cool place in original container in locked area inaccessible to children, pets, or wildlife.

Disposal: Triple rinse empty containers, and offer for recycling or disposal by federal, state, and local approved procedures.

G.F.C. Gladiator contains a blend of highly-effective water conditioning agents that are specifically designed to enhance pesticide performance by modifying water hardness and pH in the spray tank. **G.F.C. Gladiator** buffers and sequesters ions, enhancing pesticide performance. Ammoniacal nitrogen has been added to the formulation to increase uptake of some pesticides.

G.F.C. Gladiator can be used with any pesticide where interaction with ions may occur and/or ammonium sulfate is recommended in the tank mix. **G.F.C. Gladiator** should be used wherever acidifiers and acidic tank mixes are recommended. **G.F.C. Gladiator** can be used with herbicides, fungicides, insecticides and many other pesticides. **G.F.C. Gladiator** is especially effective when used with weak-acid herbicides such as 2,4-D, asulam, and glyphosate.

DIRECTIONS FOR USE

G.F.C. Gladiator does not contain surfactant or oil. If the pesticide label recommends or requires the use of a surfactant or oil, these should be added along with **G.F.C. Gladiator**. This product lowers pH into a range which enhances the performance of most weak acid pesticides. Weak-acid pesticides such as 2,4-D, asulam, and glyphosate are subject to alkaline hydrolysis at high spray pH. Use with pesticides that are compatible with lower pH. Do not use with copper-containing fungicides. Minimize worker exposure by using measures that are required for pesticide handling. **G.F.C. Gladiator** should be added to the tank mix first. Never exceed the highest recommended dose.

RECOMMENDED USE RATES

Ground: 0.5 to 2 quarts per 100 gallons

Aerial: 1 to 2 quarts per 100 gallons.

Water Conditioning: 1 to 5 pints per 100 gallons of spray tank solution is highly effective as an acidifier and water conditioner.

This product is compatible with most pesticides, however, a standard jar test is recommended to ensure compatibility.

CONDITIONS OF SALE: Glades Formulating Corporation (GFC) warrants that this product will conform to label description and is reasonably fit for purposes state on the label when used in accordance with directions under normal use. This warranty does not extend to use of this product contrary to label instruction, or under conditions not reasonably foreseen by GFC. Buyer agrees to inspect all products purchased immediately upon delivery. GFC DISCLAIMS ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSES. GFC SHALL NOT BE LIABLE FOR CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, AND GFC'S SOLE LIABILITY AND BUYER'S AND USER'S EXCLUSIVE REMEDY SHALL BE LIMITED TO THE REFUND OF THE PURCHASE PRICE.
